SUMMARY

Software Engineer with experience building analytics platforms, observability systems, and distributed backend services using React.js, GraphQL, Node.js, Java Spring Boot, and OpenTelemetry. Skilled in CI/CD automation, telemetry pipelines, and scalable microservices architecture.

EDUCATION

Indian Institute of Information Technology, Allahabad

Bachelor of Technology in Information Technology

Marks: 8.53/10

07/2021 – 06/2025

WORK EXPERIENCE

Highspot | Software Development Engineer

08/2025 – Present

Tech Stack: React.js, GraphQL, TypeScript, Ruby, MongoDB

Hyderabad

- Created 25+ tiles, charts, and tables with drilldowns, using React, GraphQL and Ruby for team analytics scorecard.
- Implemented Blueprint-Based Visualizations to generate charts from reports, covering 90% existing bar charts.
- Built end-to-end RolePlay Scorecard from scaffold to dataviews, featuring advanced CRM filter integration.
- Migrated 2 legacy scorecards to a new blueprint-based scorecard with charts and an enhanced People filter.

Zscaler, Inc | Software Development Engineer Intern

02/2025 – 08/2025

Tech Stack: Java Spring Boot, Python, Bash/Shell Scripting, OpenTelemetry, Pytest, CI/CD

Bangalore

- Architected a complete pytest automation framework integrated with GitLab CI/CD, covering 50+ test cases.
- Developed a sampling mechanism using Java Spring Boot, OTELv0.128.0 to efficiently collect and monitor performance.
- Implemented PII masking to redact sensitive data in system logs and traces.
- Achieved 91% data compression by evaluating 5 compression algorithms and implementing the most efficient one.

Fractal.ai | Software Development Engineer Intern

05/2024 – 07/2024

Tech Stack: React.js, JavaScript, Node.js, MySQL

Remote

- Architected automated test scripts using Codecept.js and Mocha.js to ensure a 100% bug-free user experience.
- Contributed to 2 projects utilizing React.js, Node.js and MySQL, enhancing front-end interfaces.
- Tuned prompt engineering for 4 LLMs to achieve significant improvements in model outputs.

PROJECTS

GameVault (Distributed Gaming Platform) | /SK-ILLish-GIT/games.sk

01/2026 – 04/2026

Tech Stack: TypeScript, React.js, Express, PostgreSQL, Prisma, MongoDB, Redis, Observability

- Built a containerized gaming platform with 10-service Docker Compose core stack and 8-container observability overlay.
- Exposed the system through a React SPA and Nginx API gateway routing requests to 5 independent Express backend services for auth, leaderboards, and 3 games.
- Integrated 3 data stores: PostgreSQL for users/auth via Prisma, Redis for token rotation and leaderboard caching, and MongoDB for game-specific session and state data.
- Instrumented all backend services with OpenTelemetry, Prometheus, Loki, Tempo, and 6 Grafana dashboards for end-to-end metrics, logs, and traces correlation.

PriceTrackEr | /SK-ILLish-GIT/PriceTrackEr | Website

11/2024 – 01/2025

Tech Stack: Next.js, Tailwind CSS, Node.js, MongoDB, Cron Jobs

- Developed a price tracking website with automated price drop alert functionality.
- Integrated cron jobs for scheduled (7am daily) data scraping from Amazon, providing users with morning alert.
- Implemented AI-generated product descriptions, keeping each under 200 words, enhancing clarity and consistency.

SKILLS

Frontend & Backend: React.js, Next.js, TypeScript, Node.js, Express.js, Java Spring Boot, REST APIs

Databases: PostgreSQL, MongoDB, MySQL, Redis, Prisma

DevOps & Observability: Docker, CI/CD, OpenTelemetry, Prometheus, Grafana, Loki, Tempo

Languages: C++, Java, Python, JavaScript, TypeScript, Bash

Concepts: Data Structures, OOP, Operating Systems, DBMS, System Design, Distributed Systems

CODING

- Solved 1600+ DSA and competitive programming problems across platforms.
- **CodeChef: Pir0_Coder (4 Star)** – Achieved Global Rank 50, 89, 212, 370, and 398.
- **Codeforces: foolcoder (Specialist)** – Achieved Global Rank 1260, 1770, 2081, and 2110.
- **LeetCode: Fibonacci_Lc (Knight)** – Achieved Global Rank 560, 570, and 776.

CERTIFICATIONS

- Pursuing PG Certification Program in **Forward Deployed Engineering (FDE)** from **IIT Roorkee**.
- Completed Skillsoft's **Bash Scripting (Track 2)**, automating common tasks with bash.
- Mastered Agile and risk analysis via Google's **Foundations of Project Management**.
